

Nouns

The things, animals and people in the world around us all have names. These names are called **nouns**.

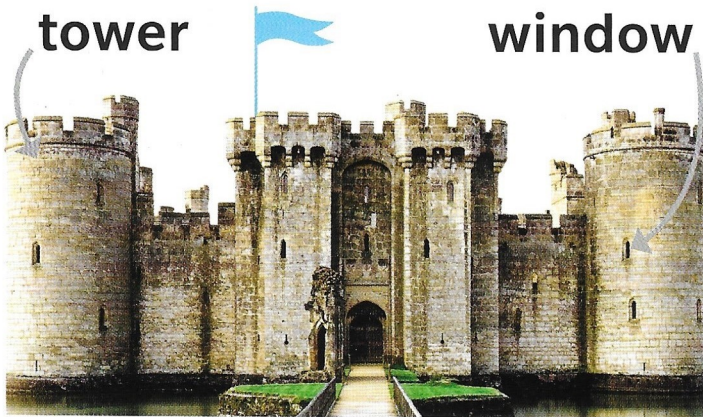

tree

tiger

castle

tractor

dinosaur

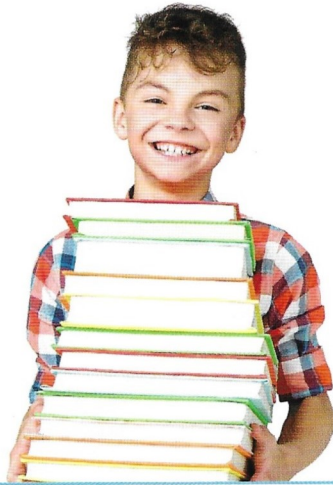

Remember!

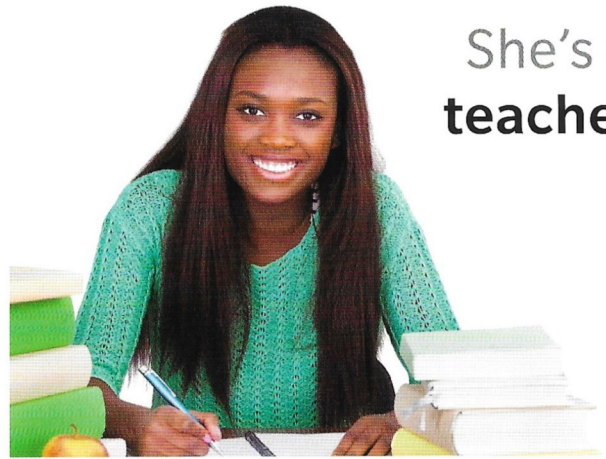

Every thing has a name,
And every name is a noun.
From a **mouse** to a **mountain**,
From a **castle** to a **clown**.

The nouns on these two pages are called **common nouns** because they don't talk about one specific thing or person. You can use the noun **tree** about any tree, and the noun **brother** about anyone's brother.

This is my
brother.

She's a
teacher.

He's a
singer.

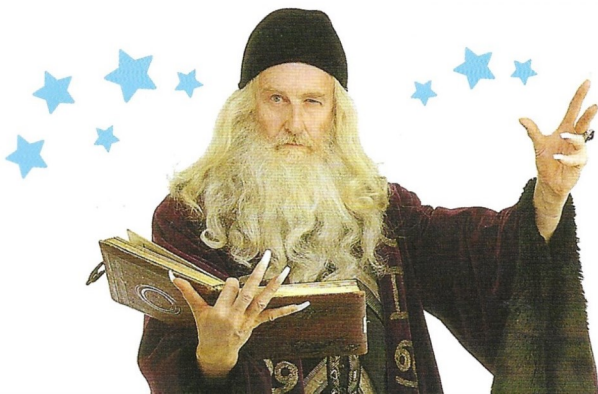

I'm the
champion.

There are also nouns for things that aren't real,
but only exist in our imagination.

He's a **wizard.**

Here's a **dragon.**
