

Roman Numerals

1 Julian has five cards with a different Roman numeral on each card.

What is the largest number he can make with these cards?

Write the number in Roman numerals.

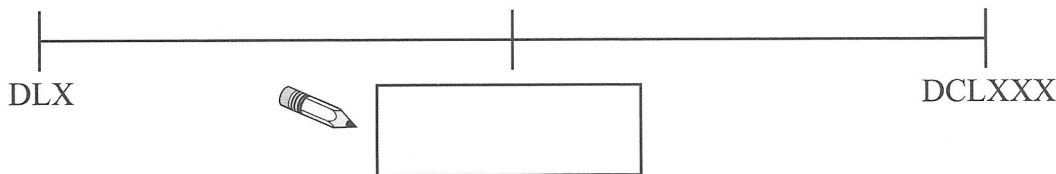

1 mark

Write the number in digits.

1 mark

2 Fill in the missing number that is halfway between the two numbers on the number line. Use Roman numerals.

1 mark

3 The boxes below show the dates, in Roman numerals, when three different head teachers were in charge of a school.

Circle the head teacher who was in charge for the longest time.

Ms Augustus:
MCMXXIV – MCMLIV

Mr Hadrian:
MCMLIV – MCMXC

Dr Nero:
MCMXC – MMXVIII

Today is Colin's 40th birthday. Write the year he was born in Roman numerals, with each letter on a different piece of paper. How many different ways can you rearrange the letters to make numbers, using all the letters? How many different numbers can you make if you don't have to use all the letters? Try this with some memorable years from history.

"I can read Roman numerals up to M, and recognise years written in Roman numerals."
