

Extreme Survival

Y3

We will learn about:

- the different climate zones
- hot and cold places in the world
- the largest hot deserts
- the coldest places in the world
- how the Bedouin people live in the desert
- how the Inuit people live in the cold
- the effects of climate change on hot and cold places

We will practise these skills:

- Identify the position and significance of Northern Hemisphere, Southern Hemisphere, Arctic and Antarctic Circle
- Describe and understand key aspects of physical geography (climate zones)
- Use 4 points of a compass, and letter/number co-ordinates to identify features on a map
- Locate places using a range of maps including OS & digital

We will learn about these significant people:

Wladimir Köppen (1846- 1940)
Geographer, meteorologist, climatologist and botanist, who classified climate in to zones.

Rita Pitka Blumenstein (1936- 2021)
The first certified traditional doctor in Alaska.

We will use this vocabulary:

latitude	continent
longitude	climate zones
equator	temperate
Northern Hemisphere	tropical
Southern Hemisphere	polar
Arctic circle	climate change
Antarctica	polar ice caps
Bedouin	greenhouse gases
Inuit	desert
