

As a school, we subscribe to Numbots (and Times Tables Rockstars in Y2-Y6) to support the children with their mental maths skills. You have been sent your child's password on Google Classroom this week.

You can access the program online, using this link in your browser:

<https://play.numbots.com/#/intro>

or by downloading the app from the app store.

The expectation is that the children complete a minimum of 3 minutes a day playing the games on Numbots.

From the home page, select **schools**, as we have subscribed to this resource for you.

Then select **pupils**, this will take you to the right area of the program for the games.

You can find our school by typing our postcode **DA1 5EA**.

You then have the option to type in your child's username and password (that you received through Google Classroom).

Your child can then work their way through the games and through the levels, which get progressively more challenging as they grow in confidence.

Happy playing!
