

Expressive Arts and Design and Understanding of the world

Make, draw, paint or cut and stick 3 animals. Where do your animals come from? Do they live in Britain or another country far away? Is their country hot or cold? Do they live on land or in the sea? How many legs do your animals have altogether? (I wonder if anyone will choose a centipede or a squid?)

This week's additional activities are based on this week's Maths story "How Many Legs?" I've recorded myself reading the story, which can be found here: <https://stanselms.primarysite.media/media/how-many-legs>

Wellbeing Activity

The boy in the story had lots of people (animals) round to his house for a party. It's not safe for us to have parties in our houses at the moment. How can we show people we love them at the moment? Especially where we can't hug everyone we care about. This video might help you with some ideas:

https://www.youtube.com/watch?v=IYnNPai4pdk&feature=emb_logo

Draw a picture of one of your ideas.

Tortoise sang a song.
Hedgehog played along.

Physical Development

How do each of the animals in the story move? Can you move like a kangaroo? How about moving like a centipede? I wonder how a squid moves? You could look it up on the internet and have a go at moving like a squid! What other animals in the story would you choose to move like?
