Sunflowers' Newsletter

The children have been really enjoying our Winter topic. Last week they made super snow monsters inspired by the story of 'Betty and the Yeti' and after reading 'One Snowy Night' they made bird feeders to help look after the birds that sometimes visit our garden. Have a look at Google classroom to see some pictures.

Maths– Growing 6,7,8

This week we will be learning how to combine groups by adding them together- counting all the items.

You can support at home by giving your child 2 groups of items and asking them to tell you how many are in each group and how many there are altogether. At this stage, most children will count all the objects again but we want to encourage them to count on eg if you know there are 5 in one group then add the next group by counting on 3 more 6,7,8,etc.

You can also support by asking children to count from a given number rather than always starting with 1 eg. give a starting number eg. 3 and count from there; 3,4,5,6,etc.

Topic- Winter

This week the children are going to become to become weather reporters! They will learn some words to describe the weather and create their own weather reports.

Try to tune in to the Weather this week (bbc iplayer) and explain some of the words that the reporters use.

Spare Clothing

If any children have an accident at school or get very wet/dirty we are happy to lend them some of our spare clothes. However, we are currently running low on our spares. If you have anything that we may have given your child to wear, please do return it once it has had a wash. If you have any items of school uniform that your child (or older siblings) has grown out of that you would like to donate to Sunflower class we would really appreciate it. We are running low on boys and girls underwear, tights, socks and school trousers. Also if you have any small plastic bags to spare we will make use of them!

Thank you for your continued support.
