

# Planting B

Year 1

## Knowing More, Remembering More

### Remembering previous learning

What happens to plants in spring? In spring, plants start to grow.

What happens to trees in spring? Some trees regrow their leaves.

What happens to the days in spring? There are more hours of daylight and the nights start to become shorter.

What is the weather like in spring? The weather often changes quickly in spring but is becoming warmer.

What is a plant? A plant is a living thing that usually grows in soil.

What are the main parts of a plant? Some plants have roots, a stem, leaves and flowers.

What is a seed? A seed can be planted to grow into a new plant.

## In this unit children will:

- Identify and describe the basic structure of a variety of common flowering plants, including trees.

## Working Scientifically:

- 1.6 Observe closely
- 1.8 Gather and record simple data
- 1.9 Sort objects and living things into groups based on simple properties.

## Key Learning Steps

1. Observe changes
2. Plant -

## Key Vocabulary:

**plant** - a living thing that usually grows in soil

**seed** - a part of a plant that can grow into a new plant

## Key Scientists:

**Contemporary**  
Alan Titchmarsh  
English gardener and broadcaster

## Knowing More, Remembering More

### Knowing more in Y1

What happens to a plant when it grows? The stem will grow in length. It will grow new leaves. The roots will become longer. Some plants will grow flowers.
