

ADDITION & SUBTRACTION - KNOWLEDGE & SKILLS PROGRESSION

		KEY STAGE 1		LOWER KEY STAGE 2		UPPER KEY STAGE 2		
				YEAR 4		YEAR 5		
						YEAR 6		
NUMBER BONDS	1.14	represent and use number bonds and related subtraction facts within 20	2.14	recall and use addition and subtraction facts to 20 fluently, and derive and use related facts up to 100				
	1.15	add and subtract one-digit and two-digit numbers to 20, including zero	2.15	add and subtract numbers using concrete objects, pictorial representations, and mentally, including: <ul style="list-style-type: none"> * a two-digit number and ones * a two-digit number and tens * two two-digit numbers adding three one-digit numbers	3.15	add and subtract numbers mentally, including: <ul style="list-style-type: none"> * a three-digit number and ones * a three-digit number and tens * a three-digit number and hundreds 	5.15	add and subtract numbers mentally with increasingly large numbers
MENTAL CALCULATION	1.16	read, write and interpret mathematical statements involving addition (+), subtraction (-) and equals (=) signs (appears also in Written Methods)	2.16	show that addition of two numbers can be done in any order (commutative) and subtraction of one number from another cannot			6.16	use their knowledge of the order of operations to carry out calculations involving the four operations
	1.17	read, write and interpret mathematical statements involving addition (+), subtraction (-) and equals (=) signs			3.17	add and subtract numbers with up to three digits, using formal written methods of columnar addition and subtraction	4.17	add and subtract numbers with up to 4 digits using the formal written methods of columnar addition and subtraction where appropriate
WRITTEN METHODS						5.17	add and subtract whole numbers with more than 4 digits, including using formal written methods (columnar addition and subtraction)	

INVERSE OPERATIONS, ESTIMATION & CHECKING						
		2.18 recognise and use the inverse relationship between addition and subtraction and use this to check calculations and solve missing number problems.	3.18 estimate the answer to a calculation and use inverse operations to check answers	4.18 estimate and use inverse operations to check answers to a calculation	5.18 use rounding to check answers to calculations and determine, in the context of a problem, levels of accuracy	6.18 use estimation to check answers to calculations and determine, in the context of a problem, levels of accuracy.
	1.19 solve one-step problems that involve addition and subtraction, using concrete objects and pictorial representations, and missing number problems such as $7 = \square - 9$	2.19 solve problems with addition and subtraction: <ul style="list-style-type: none"> * using concrete objects and pictorial representations, including those involving numbers, quantities and measures * applying their increasing knowledge of mental and written methods 	3.19 solve problems, including missing number problems using number facts, place value and more complex addition and subtraction	4.19 solve addition and subtraction two-step problems in contexts, deciding which operations and methods to use and why	5.19 solve addition and subtraction multi-step problems in contexts, deciding which operations and methods to use and why	6.19 solve addition and subtraction multi-step problems in contexts, deciding which operations and methods to use and why
	2.20 solve simple problems in a practical context involving addition and subtraction of money of the same unit, including giving change				6.20 Solve problems involving addition, subtraction, multiplication and division
