

# Plants

## Lesson 2

What do plants need to grow?

### Observation Activity 1

Observe the seeds of different fruit, vegetable and flowers that you have in the kitchen or in your garden.

### Growing plant experiment

- Grow a plant from seeds in a pot like sunflowers or cress
- Provide the plant with all the conditions it needs to survive and grow. (water, air, light, soil and temperature)
- Keep a diary record of what happens to your seed and plant every day.
- Measure the height of your plant with a ruler every other day to see how it grows.
