

Science Lesson 3

Minibeasts and microhabitats

1. What is a microhabitat?

A microhabitat is a small specialized habitat within a larger habitat. An example of a microhabitat is a caterpillar snacking on leaves which have fallen from a walnut tree in an orchard.

2. What are minibeasts or invertebrates?

bbc.co.uk/bitesize/topics/z6882hv/articles/z9fkwmn

3. Identify the minibeasts that you can find in your garden or in a microhabitat. Use the checklist to help you.
