

Science

Making positive changes to our local environment.

On the map is the school site. Do you recognise any parts of the school? Label those areas.

TASK

Your mission is to find ways to improve our school site for wildlife. Number areas on the plan and write how you would improve that part of the school.

You must include the improvement. Why you are doing it and the effect it might have on the area.

Eg A wildflower meadow. Wildflowers attract bees and other flying insects. This helps with pollination of plants and provides a food source for those insects which are in decline.

When you have written at least 3 improvements to our school site , you can draw illustrations around the map.

Use these websites to help you with your research:
